For Immediate Release

pragma Systems Releases processMax for CMMI® Level 3

Reston, Virginia (December 15, 2006) – pragma Systems Corporation, the market leader in software for process improvement, has announced its latest release—**processMax for CMMI Level 3**. The new release is a complete project management system that provides guaranteed compliance with the CMMI (Capability Maturity Model® Integrated).

processMax for CMMI Level 3 includes all the necessary policies, guidelines, criteria, templates, and forms, organized around role-based, step-by-step procedures, ready for use—everything needed for compliance with the CMMI at the maturity level 3. **processMax** also includes a complete measurement and reporting capability. Measurement collection and report generation are fully automated: providing managers real-time, fact-based insight into all aspects of project progress.

By integrating procedures with document management, risk management, workflow, measurement, and reporting, **processMax** ensures that procedures are actually followed, not collecting dust in binders on shelves. **processMax** is *the* intranet web-based solution for effective and efficient project management—and the only project management system on the market providing guaranteed CMMI compliance.

“Achieving compliance at Level 3 usually takes four years and hundreds of thousands of dollars,” said Rebecca Bowerman, President and CEO of pragma Systems. “With **processMax**, compliance can be achieved in a few months and at a fraction of the costs. Moreover, **processMax**’s automated approach makes measurement and compliance far easier to maintain.”

About pragma Systems

pragma Systems Corporation (www.pragmasystems.com) has been in the software process improvement and assessment business since 1990, and is the market leader in project management products that comply with the Software Engineering Institute’s (SEI) Capability Maturity Model for Software (SW-CMM®)

and Capability Maturity Model Integration (CMMI). pragma Systems was one of the first companies licensed by SEI to perform software process assessments. pragma Systems uses its own products and has been assessed at SW-CMM Level 3, as determined by independent SEI-licensed Lead Evaluators. **processMax** and related services are on the GSA Schedule. pragma Systems is headquartered in Reston, Virginia.
