pragma Systems Makes processMax Available as a Service

Vienna, Virginia (May 20, 2009) – pragma Systems Corporation, the market leader in CMMI[®]-compliant project management systems, announced that its **processMax 2i and 3i** products are now available as hosted services on a subscription basis.

processMax 2i and 3i are comprehensive project management systems that include all the necessary policies, procedures, guidelines, criteria, templates, and forms, in role-based, step-by-step instructions, ready for use — everything needed for compliance with the CMMI-DEV at Level 2 and Level 3 respectively. Integrated with robust document management, MS Project, workflow, and automated measurement and reporting, processMax is the web-based solution for effective and efficient management of software and systems engineering projects.

processMax includes detailed step-by-step procedures, written from the point of view of each project manager and team member. For each step of every procedure, processMax provides clear instructions that are integrated with one-click access to the latest versions of all project documents relevant to that step. This integration of procedures with the project's repository ensures that the procedures are followed, not collecting dust in binders on shelves.

processMax enables organizations to start operating in compliance with the CMMI immediately! pragma Systems guarantees that organizations using **processMax** will not fail a formal appraisal led by an independent SEI-licensed appraiser.

“Achieving CMMI compliance is now more cost-effective than ever,” said Rebecca Bowerman, President and CEO of pragma Systems. “With **processMax** available as a service, compliance can be achieved without capital investment. Moreover, **processMax**'s automated approach makes process performance, measurement, and compliance far easier to maintain.”

About pragma Systems

pragma Systems Corporation (www.pragmasystems.com) has been in the software process improvement and assessment business since 1990, and is the market leader in project management products that comply with the Software Engineering Institute's (SEI) Capability Maturity Model for Software (SW-CMM®) and Capability Maturity Model Integration (CMMI). pragma Systems was one of the first companies licensed by SEI to perform software process assessments. pragma Systems uses its own products and was assessed at SW-CMM Level 3, as determined by independent SEI-licensed Lead Evaluators. **processMax** and related services are on the GSA Schedule. pragma Systems is headquartered in Vienna, Virginia.
